Edit News Screen

The screenshot displays the 'Edit News' interface within the 'WEB CONTENT MANAGEMENT SYSTEM'. The header includes the 'EFFORTS SOLUTIONS' logo, the system name, a 'Welcome Super Admin' message, and a timestamp of '11-11-2009 08:28:25'. Navigation options for 'My Account', 'العربية', and 'Logout' are also present.

The main navigation bar contains tabs for 'Employees', 'News', 'Gallery', 'Advertisement', 'Newsletter', 'Information', and 'Feedback'. Below this, a secondary bar offers actions: 'Add News', 'Manage News', 'Add News Type', and 'Manage News Types'. The 'Manage News' tab is currently active.

The left sidebar provides a 'My Favorites' section with links to 'Dashboard' and 'Manage Polling'. Below this, a vertical menu lists administrative functions: 'Super Admin', 'Configuration', 'Site Settings', 'Employees', 'News', 'Gallery', 'Advertisement', 'Newsletter', and 'Information'. The 'News' menu is expanded, showing sub-options: 'Add News', 'Manage News', 'Add News Type', and 'Manage News Types'.

The central 'Edit News' form is divided into two sections:

- News Information:** This section contains a 'News Type' dropdown menu set to 'Aviation', a 'Title' text box with 'new aviation news', a 'Photo' field with a 'Browse...' button, a 'Reference' text box with 'http://www.aviationsample.com', a 'Date' field with '11 / 11 / 2009', and a checked checkbox for 'Create RSS Feed for this news'.
- Detailed Information:** This section features a rich text editor with a toolbar containing icons for source, undo, redo, bold, italic, underline, text color, background color, bulleted list, numbered list, link, unlink, and other formatting options. Below the toolbar are dropdown menus for 'Style', 'Format', 'Font', and 'Size'. The text area contains a paragraph of sample text: 'This seems especially case among Portals, Enterprise Content Management (ECM), and Web Content Management (WCMS) systems, where we see a lot of overlap in vendors, product functionality, and marketing messages. For example, if you're looking to implement Intranet-based document management, you could conceivably use any of those three types of products. Some consultancies will try to sell you all three types of solutions, with the obligatory integration project.'
